

TRACTION BATTERY, VENTED

High performance and durability

NM125-6DC

Nordmax Deep cycle 6V 240Ah AM terminal

- Dimensions according to international standards
- Carefully selected products
- High cycle durability
- Equivalent to TROJAN

Product description

The Nordmax range of traction batteries meets high quality standards.

Designed in accordance with international standards, these batteries are carefully selected to ensure excellent performance and durability.

Nordmax traction batteries offer high cycle durability, meaning they can withstand frequent charge and discharge cycles. This is especially important for vehicles operating under demanding conditions.

Nordmax is committed to delivering batteries that are comparable to those from the most respected traction battery manufacturers on the market. We are proud to offer a product that matches leading brands in both performance and longevity.

This product line is specifically designed to fit a variety of vehicles, such as golf carts and lifts, allowing you to choose a battery tailored to your specific needs.

If you're looking for reliable, high-quality traction batteries at a competitive price, the Nordmax series is definitely worth considering.
